

LUSAKA VOCATIONAL TRAINING CENTRE

MEMORANDUM REPORT

TO: VICE PRINCIPAL

FROM: IT/SYSTEM ADMINISTRATOR

DATE: 18TH JUNE, 2021

TITLE: ONLINE BOARDING SYSTEM REPORT

1. Audit conducted in the male hostels.
 - 1.1 Refer to the attached list of the legally allocated bed spaces printed from the system.
 - 1.2 Four students were allocated to room 8 hostel 2 by the direction from the boarding master and the security guard. Stating that the initial number of students in room 8 was supposed to be 8.
2. Loopholes noted.
 - 2.1 Management failed to provide clear information as to what was the way forward regarding the **Technician** students and **Student Union** executive who claimed to have been told by management to be in boarding without being cleared in the system.

Note: The system administrator approached offices below for clarity regarding the noted illegalities in the male hostels and there was no clear response given.

 1. **Vice Principal:** As students claimed this office was aware of the situation.
 2. **HoS Engineering:** As the immediate supervisor of any content regarding the system.
 3. **Boarding patron:** As the responsible officer of the male hostels and students claimed he was aware of the situation.
 4. **Security guards:** As the responsible officers to give mattresses.
3. Reversing the allocations and reporting to management
 - 3.1 All allocations can be reversed with full information from the boarding patron/matron as the responsible officers.
4. Exonerating myself from the allegations of failure to manage the system professionally.
 - 4.4 System administrator is not the responsible officer for boarding and room allocation and the system was developed with boarding masters accounts to perform the task.
 - 4.5 Boarding patron and matron were trained on how to use the system on boarding applicants, allocate rooms and removal of unsuccessful applicants.

- 4.6 The system administrator was not assigned by management to act as boarding master in absence of boarding masters.
- 4.7 The system administrator was only asked by the matron to help her allocating the room numbers to students with receipts while she was away.
- 4.8 It was not the duty of the system administrator to conduct a roll call in the hostels to identify students occupying bed spaces illegally.
- 4.9 The system administrator has a specific role on the system and only performs other roles when directed by management.

SUGGESTIONS

1. Management to be fully aware of the active system modules (accounts) and duties of the responsible officers on each module.
2. Management to officially inform the system administrator to act or perform the role of another officer on the system in their absence.
3. Management to ensure assigned officers to the system perform their role and only engage the system administrator when a technical error occurs.

RECOMMENDATIONS

1. System security policy to be implemented in order to guide the users of the computerized system and clearly stipulates their specific roles.
