2.0 Rationale

In order to keep abreast with global trends and advancements in the business and management field, industry has seen the need to have training provided at Diploma level in order to have a supply of the much needed personnel operating in between the level of a Clerk and Manager. In addition, the country has seen an influx of foreign qualifications in this field at various levels, clearly spelling out a need to have a qualification at Diploma level that addresses the local needs. This programme permits a graduate to work in important areas such as research and other advanced business engineering functions.

The course is designed to equip trainees with skills, knowledge and appropriate attitudes of a business administrator. Studies on this course include application of methods and concepts in strategic Management, Production and Operations Management, International Business and Entrepreneurship to broaden trainees' management concepts. The programme prepares the trainee for middle management position as an administrator or supervisor.

3.0 Programme Purpose

To provide industry with competent administrators, who will be able to apply theoretical and administrative concepts in carrying out their work; as well as carry out general managerial functions. The programme will provides trainees with the ability to establish their own business, smooth progression into degree programmes and more employment opportunities.

4.0 Programme Objectives

A graduate assessed as competent against this qualification will be able to

1. Design, continuously develop and maintain organizational database to facilitate smooth operations;
2. Conduct research for organizational improvement;
3. Provide quality customer care to acceptable standards;

4. Accurately prepare and interpret financial reports;
5. Formulate acceptable strategic plans;
6. Manage staff welfare issues effectively;
7. Communicate effectively and efficiently with all stakeholders;
8. Market a business and its products and services effectively; and
9. Start and/ or profitably manage a small scale business in compliance to laws, regulations and procedures.
10. Carry out mathematical calculations relevant to business organisations

5.0 Course Duration

The duration of the programme is 3 years with a total of **3785** hours. Trainees shall have 6 semesters in College.
